

ZFM1080 Automatic Laminating Machine

Features:

1. Less temperature difference, high-speed operation, saving electric energy, and faster speed on the premise of ensuring the coating quality.
2. The water-based glue can be solidified quickly to achieve the purpose of high-speed film covering.
3. The roller surface is chrome plated and polished, with long service life and easy cleaning.
4. Equipped with pre-stacking mechanism to save downtime.
5. The front gauge and pull gauge ensure the straightness of paper feeding and film covering accuracy.
6. Servo motor control lap joint, centralized control of display screen for easy operation

Technical parameter

Model	ZFM1080S	ZFM1080M	ZFM1080L
Film Type	BOPP only	BOPP only	BOPP only

Max. sheet size(W*L)	1080*880mm	1080*120mm	1080*1450mm
Min. stripping size(W*L)	320*260mm	320*260mm	320*350mm
Speed	20-100 meters / min	20-100 meters / min	20-100 meters / min
Paper Thickness	80-500g/m ²	80-500g/m ²	80-500g/m ²
Max. consumption power	69KW(AC380 V/3PH/50Hz)	70KW(AC380 V/3PH/50Hz)	71KW(AC380 V/3PH/50Hz)
Max. piling height	1300mm	1300mm	1300mm
Machine dimensions	9200*2900*3100 mm	10200*2900*3100mm	11800*2900*3100mm
Weight	8800 KGS	9000 KGS	9600 KGS
